

Green Public Procurement Tool for Federal Assets Virtual Consultation: Lighting Products

Green Product Database Pilot Project

Consultation Supported by:

Tuesday February 18, 2025

1 - 2:30 PM EST (Zoom)

Public Services and
Procurement Canada

Services publics et
Approvisionnement Canada

Today's Objectives

- ◆ Learning about the Green Public Procurement Tool for Federal Assets Initiative – what it is and what it's trying to do
- ◆ Hearing from you
 - ◆ Are the environmental certifications we cover today ones you recognize?
 - ◆ Do you use these in your organization / industry?
 - ◆ What is missing and what do you recommend for the Canadian version?
- ◆ Learning about the product search platform itself and what its capabilities are

Getting to know you:

Stakeholder type?

Organization HQ?

Business size?

Today's Agenda

Content	Organization
Welcome & PSPC overview Green Public Procurement Tool Pilot Phase	Public Services and Procurement Canada
Platform overview: Pilot Canadian version of the database	ecomedes
Stakeholder engagement overview Customization of U.S. platform	Circular Innovation Council
Stakeholder Feedback Review of Ecolabels and Certifications Additional Suggestions and Feedback	Circular Innovation Council
Customization process and onboarding Q & A	ecomedes
Next Steps	Circular Innovation Council

Public Services and Procurement Canada: Overview

PSPC is the central federal purchasing agent and real property manager for the Government of Canada

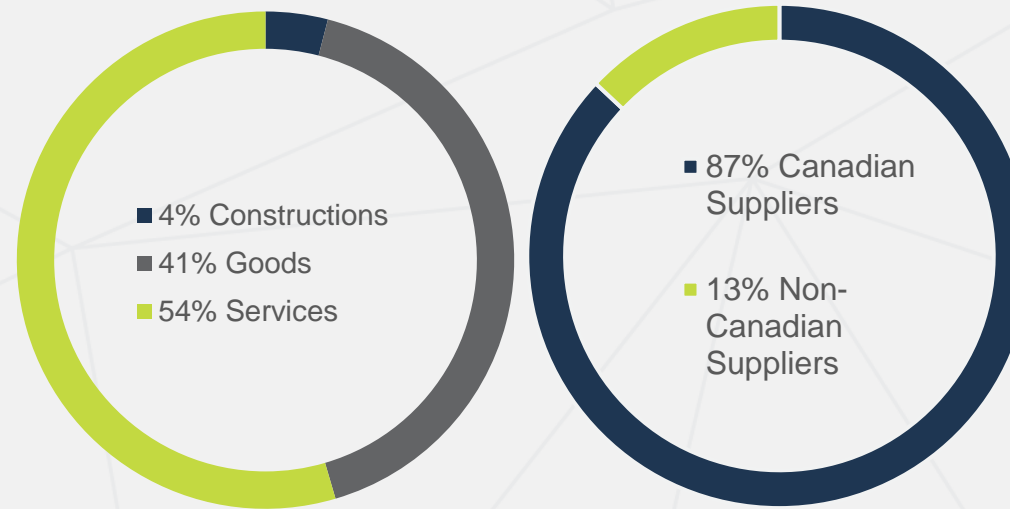

Vision: to excel in government operations

Mission: to deliver high-quality, central programs and services that ensure sound stewardship on behalf of Canadians and meet the program needs of federal institutions

The GoC owns approx. 32,000 buildings, 20,000 engineering assets and 40,000 fleet and is the largest asset owner in Canada.

Average Annual Value of Federal Procurement over 3 Fiscal Years: 2020-2021 to 2022-2023

\$25.2B Contracts Awarded via PSPC's Acquisitions Program¹

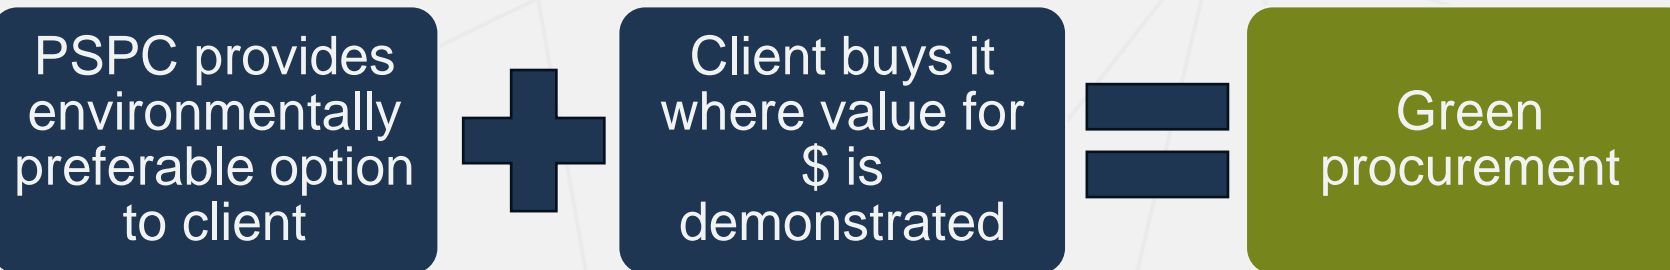

\$9B Contracts Awarded via Other Federal Governments²

¹PSPC Business Analytics Services Directorate 2024

²Open Canada 2024

Policy on Green Procurement, 2006

- ◆ PSPC will: “include environmentally preferable options (i.e. that have a lesser or reduced impact on the environment over the life cycle of the good or service, when compared with competing goods or services serving the same purpose) in the procurement services offered to client departments where feasible.”

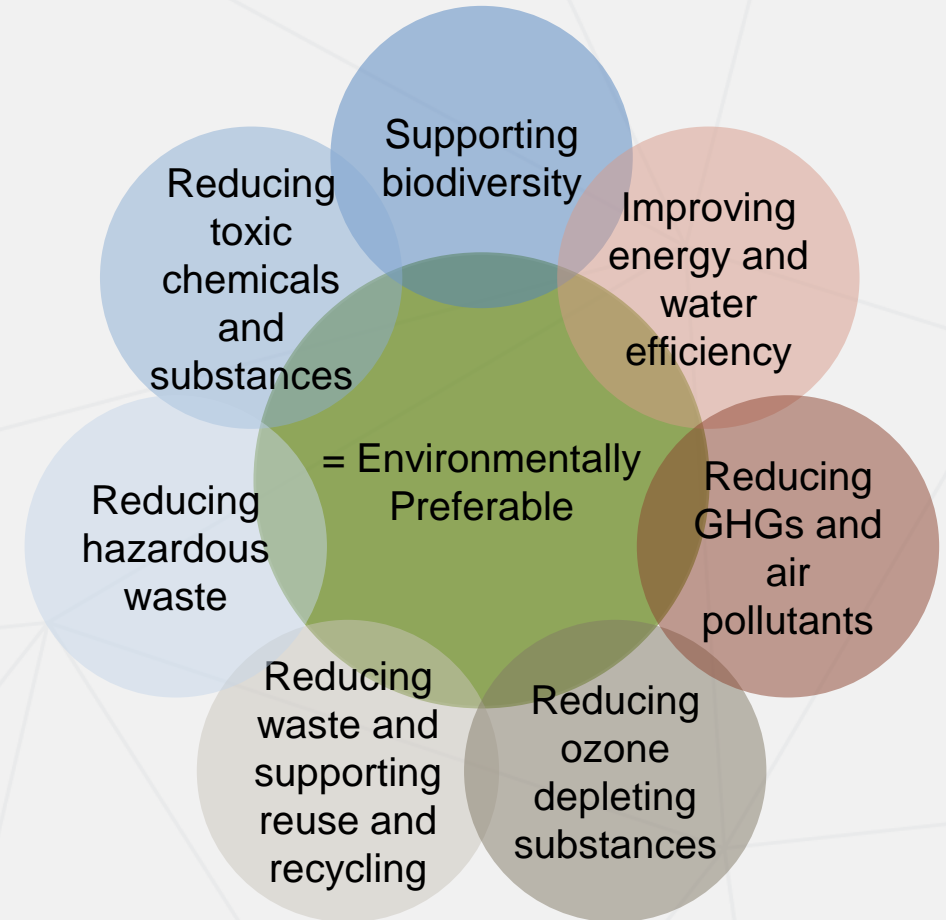

Definition of “Green” or environmentally preferable

“Environmentally preferable goods and services are those that have a lesser or reduced impact on the environment over the life cycle of the good or service, when compared with competing goods or services serving the same purpose. Environmental considerations include, among other things: the reduction of greenhouse gas emissions and air contaminants; improved energy and water efficiency; reduced waste and support reuse and recycling; the use of renewable resources; reduced hazardous waste; reduced toxic and hazardous substances; and biodiversity.”

- Policy on Green Procurement

- Canada’s Competition Bureau requires that environmental claims must not be false or misleading and must be based on adequate and proper testing

Definition of Clean technology

The Government of Canada defines clean technology as:

- Any good or service designed with the primary purpose of contributing to remediating or preventing any type of environmental damage.
- Any good or service that is less polluting or more resource efficient than equivalent normal products that furnish a similar utility.

Examples include: renewable and non-emitting energy; smart grid and energy storage; advanced and lightweight materials; energy efficiency controls and design; air, water, wastewater and environmental remediation; transportation; waste and recycling; and biofuels and biomaterials.

Source: Clean Technology Data Strategy: <https://ised-isde.canada.ca/site/clean-growth-hub/en/clean-technology-data-strategy>

Objectives of the GPPT

Primary objective:

- ◆ To help buyers (contracting authorities) and clients to easily identify green and cleantech products

Secondary objectives:

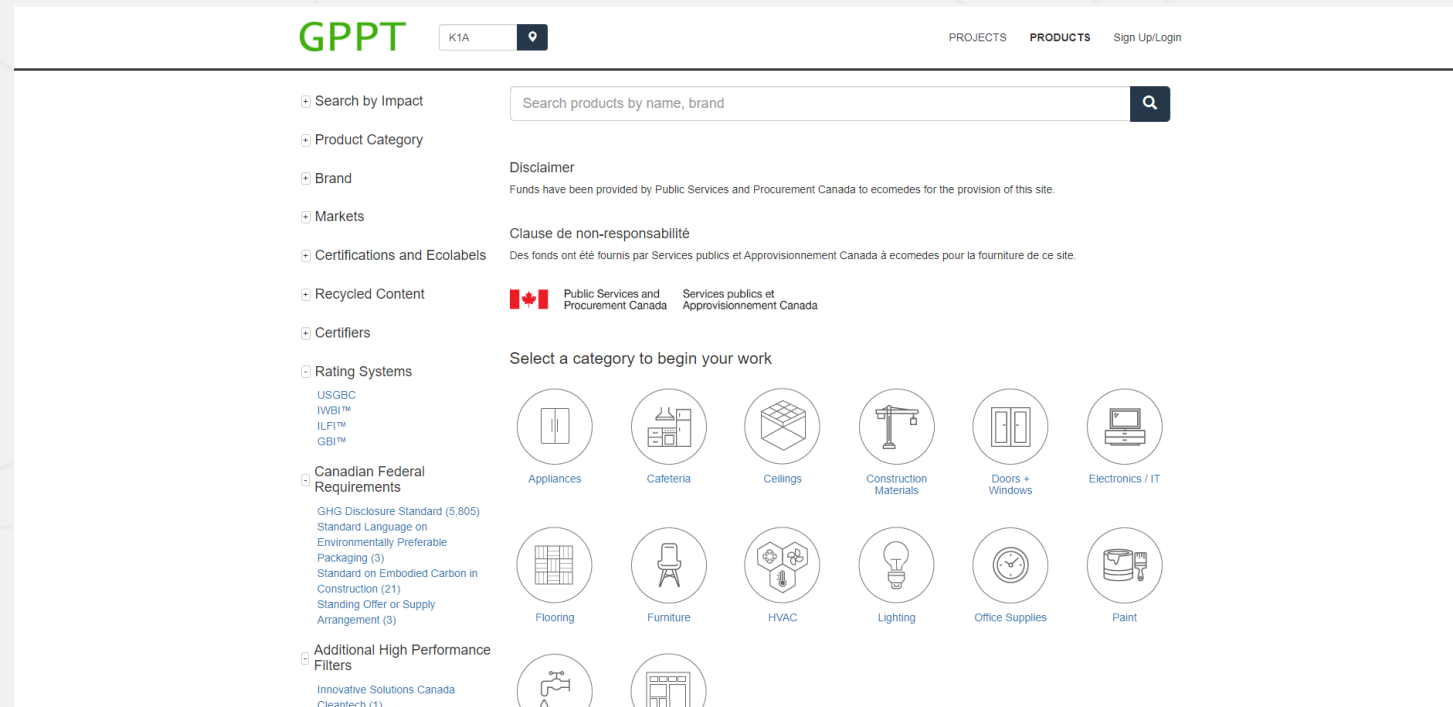

- ◆ Enable PSPC to meet its responsibilities under the Policy on Green Procurement to provide verified and up-to-date environmentally preferable options to client departments
- ◆ Align green procurement requirements with the U.S. and other public procurers to better signal market demand
- ◆ Increase green and clean technology procurement and support Canadian SMEs

Configuring a Canadian Green Product Search Tool

What is it?

- Customized and configured (“Canadianized”) version of a certified environmentally preferable products database used by the United States General Services Administration and other large institutional buyers in the U.S. (e.g. universities, the Sustainable Purchasing Leadership Council etc.) in procurement and real property applications

GPPT Timeline

Year 1:
2023-24

- Project kick-off with supporting Contractors (ecomedes, Circular Innovation Council, MaRS)
- Build Core Internal Project Team
- Develop assessment framework
- Initiate stakeholder engagements (five category groups)

Year 2:
2024-25

- Customize database for Canada with existing federal procurement requirements:
 - GHG Disclosure
 - Packaging
 - Clean Tech
- Develop & obtain approval for category-specific filter recommendations for 5 category groups and code into database
- Conduct stakeholder engagement on 12 category groups

Year 3:
2025-26

- Develop & obtain approval for stakeholder-informed category-specific filter recommendations for 10 category groupings and code into database
- Launch official website in both official languages
- Continue to onboard domestic suppliers, manufacturers and firms

Year 4 and beyond

- Secure source of funding to continue this initiative!

How we intend to use the GPPT in Canada – pilot phase

- ◆ Internally: as a research tool to share information between clients and buyers about available environmentally preferable products including those from Canadian cleantech SMEs
 - ◆ Externally: available publicly to anyone, the database is a public source of third-party verified environmental information that is up-to-date (database updated monthly) and available for use across supply chains and product categories
 - ◆ As more Canadian products are added and as the certifications are vetted, there is the potential that its use be incented or required in procurement processes and in real property contracting
-

Introduction to ecomedes

Simplify **Product Research and
Accelerate **Sustainable Procurement**
by automating the **Search** for sustainability data,
automating compliance **Analysis** and
streamlining **Documentation & Reporting****

Ecomedes Technology

Data Collection & Curation

Ecomedes Technology

Platforms configured for Institutional Buyers

Canada.ecomedes.com

How Does this Help You?

- The platform was designed to save you time
- Increase Green Procurement within Government
- Streamline Green procurement reporting for Agencies and Departments

Some of the most common activities that the platform streamlines:

- **Searching** for products that meet the certifications, ecolabels, specifications, etc
- **Analyzing** product performance attributes
- **Documenting** procurement and project decisions
- **Sharing** Impact Reports with project team members

Platform Tour

Pilot Account Sign-up

The screenshot shows the GPPT website interface. At the top, there's a header with the GPPT logo, a search bar containing '33909', and navigation links for 'PROJECTS', 'PRODUCTS', and 'Sign Up/Login'. A green arrow points to the 'Sign Up/Login' link. Below the header, there's a sidebar with filters for 'Search by Impact' (Carbon, Circularity, Energy, Health, ROI, Water), 'Product Category', 'Brand', 'Certifications and Ecolabels', 'Certifiers', and 'Rating Systems'. The main content area displays a 'Disclaimer' and 'Clause de non-responsabilité' in both English and French, followed by a 'Select a category to begin your work' section with icons for Appliances, Cafeteria, Ceilings, Flooring, Furniture, HVAC, Lighting, Office Supplies, Paint, Plumbing, and Walls. A modal window is overlaid on the page, titled 'Welcome' and 'Log in to Ecomedes Inc. to continue to Ecomedes.' It contains fields for 'Email address' and 'Password', a 'Forgot password?' link, a blue 'Continue' button, and a 'Don't have an account? Sign up' link.

Simple Signup takes 1 minute & saves 100s of hours per year

- The Platforms are typically open to anyone that wants to simplify sustainable product search, analysis and documentation.
 - Procurement Teams
 - Vendor Teams
 - Project Teams
 - Manufacturer Teams
- Creating an account lets you:
 - Analyze Products and projects
 - Download product documentation
 - Save your work on projects

Search & Discovery: Driven by Data

- Search by Impact
- Product Category
- Brand
- Certifications and Ecolabels
 - Over 50 to choose from
 - This can be configured to your needs
 - Additional Resources can be added

Freedom® Headrest / 20579

Category

Building Furnishings

Subcategory

Furniture

Type

Chairs & Stools

With innovative recline that provides constant support and a pivoting backrest that automatically adjusts to the needs of the spine, the Freedom chair is exceptionally comfortable and promotes movement throughout the day. Its refined and sculpted cushions were designed to mimic the body's natural contours and decrease pressure point loads for premium comfort. The Freedom chair features a dynamic, articulating headrest to support the head and neck as users recline. It moves with the sitter, so they can change postures without making manual adjustments and stay comfortable in any position.

THE PUBLIC PROCUREMENT OPPORTUNITY

- Annual Public Sector Procurement Spend represents **13%** of Canada's GDP
- **Direct and Indirect** Influences:
 - Direct spending on goods and services.
 - Stimulus to the economy.
 - Funding to other organizations.
 - Training and employment.
- Most **immediate and direct mechanism** to drive broader public policy objectives: economic, environmental, and social.
- **Pace setter and market shaper.**
- **Scalable** no matter size nor location.

**\$ 300
BILLION**

Amount spent on
public sector
procurement in
Canada annually.

GPPT Customization Methodology

- Review and summarize existing U.S. GSA and other environmental labels and product certifications available within ecomedes platform
- Research additional relevant Canadian product-focused environmental labels and certifications
- Stakeholder engagement including
 - Virtual consultations, based on product categories
 - Stakeholder feedback survey (online)
 - Targeted engagements: industry associations, domestic manufacturers, etc.
- Based on stakeholder feedback, propose environmental labels and other data sources (*third party verified*) that reflect environmental preferability relevant to domestic Canadian perspective
- PSPC finalizes product category filters selection
- Import into GPPT

Customization of ecomedes Product Search Tool developed for U.S. General Services Administration

Basis for U.S. GSA tool:

- ◆ Third-party verified data
 - ◆ Simplify informed decision making
- ◆ Ecolabelling programs
 - ◆ Voluntary, consensus-based
 - ◆ Multiple 'attributes' preferred (i.e. more than one environmental impact)
- ◆ U.S. EPA 'required purchasing programs' basis
 - ◆ EPA Framework for the Assessment of Environmental Performance Standards and Ecolabels for Federal Purchasing

Light Fixtures

PRODUCT DETAILS

To the maximum extent practicable, federal agencies are required to buy sustainable products, which are products that meet the purchasing program(s) listed below.

If there is more than one program listed below, agencies are directed to prioritize multi-attribute products, which meet statutory purchasing program requirements (*) and one or more required Environmental Protection Agency purchasing programs.

Stakeholder Consultation

Key Objectives Today

- ◆ Gather your insights on ecolabels and certifications stakeholders are using for each product category
- ◆ Identify additional certifications, standards and ecolabels that should be considered
- ◆ Solicit feedback on the benefits and obstacles of such ecolabels/ and certifications
- ◆ Solicit other considerations for the GPPT tool
- ◆ Identify whether your products may already be represented in the searchable database

Qualitative/Open Feedback

Chatham House Rule

- When a meeting, or part thereof, is held under the Chatham House Rule, participants are free to use the information received, but neither the identity nor the affiliation of the speaker(s), nor that of any other participant, may be revealed. The purpose of the rule is to encourage open discussion since anything said is "off the record".
- Facilitators are neutral parties who will filter the input and feedback gathered into a summary document. No contracting authorities are here today.

Product Sub-category Feedback

◆ Mural Board post-it notes

◆ Double-click on post-it note to type in feedback to questions

LIGHTING

Procedural

1. Are there certifications/standards that we have and use in Canada that should be considered and are not listed here (in one or both official languages)? **If so, which one(s)?**

2. Are you aware of other international environmental certifications/standards that are applicable to **lighting products** or that may be used in this industry, which you would recommend for inclusion moving forward? **If so what are they and why?**

Environmental

3. For ecolabels you are familiar with, are there environmental impact categories that are missing or important from a Canadian perspective? **If so, which ones?**

4. Are there life cycle stages not being considered? **If so, which ones?**

5. Are there environmental criteria which would be more impactful? **Which one?**

Other Considerations

6. **In your opinion**, are certifications and verification fees transparent?

7. Are there other sources of third-party verified data that identify environmental performance or preferability that should be considered in this category? **Which organization or certification?**

Social

8. Are you aware of 3rd party certifications applicable to this category that Canada might eventually like to include in relation to:

- a) Diversity and inclusion
- b) Indigenous reconciliation
- c) Forced labour and modern slavery
- d) Gender Based-Analysis (including LGBTQ2+)
- e) Persons with disabilities
- f) Economic equality

Consultation & onboarding process per category

Stage 1: Collect multiple streams of input and review research findings:

- ❑ What certifications and programs are currently used by Canadian manufacturers?
- ❑ What do other levels of government, other stakeholders specify?
- ❑ Once we know the relevant certifications and programs, are there product registries?

Stage 2: Draft Product Filter Recommendations and ecodata requirements

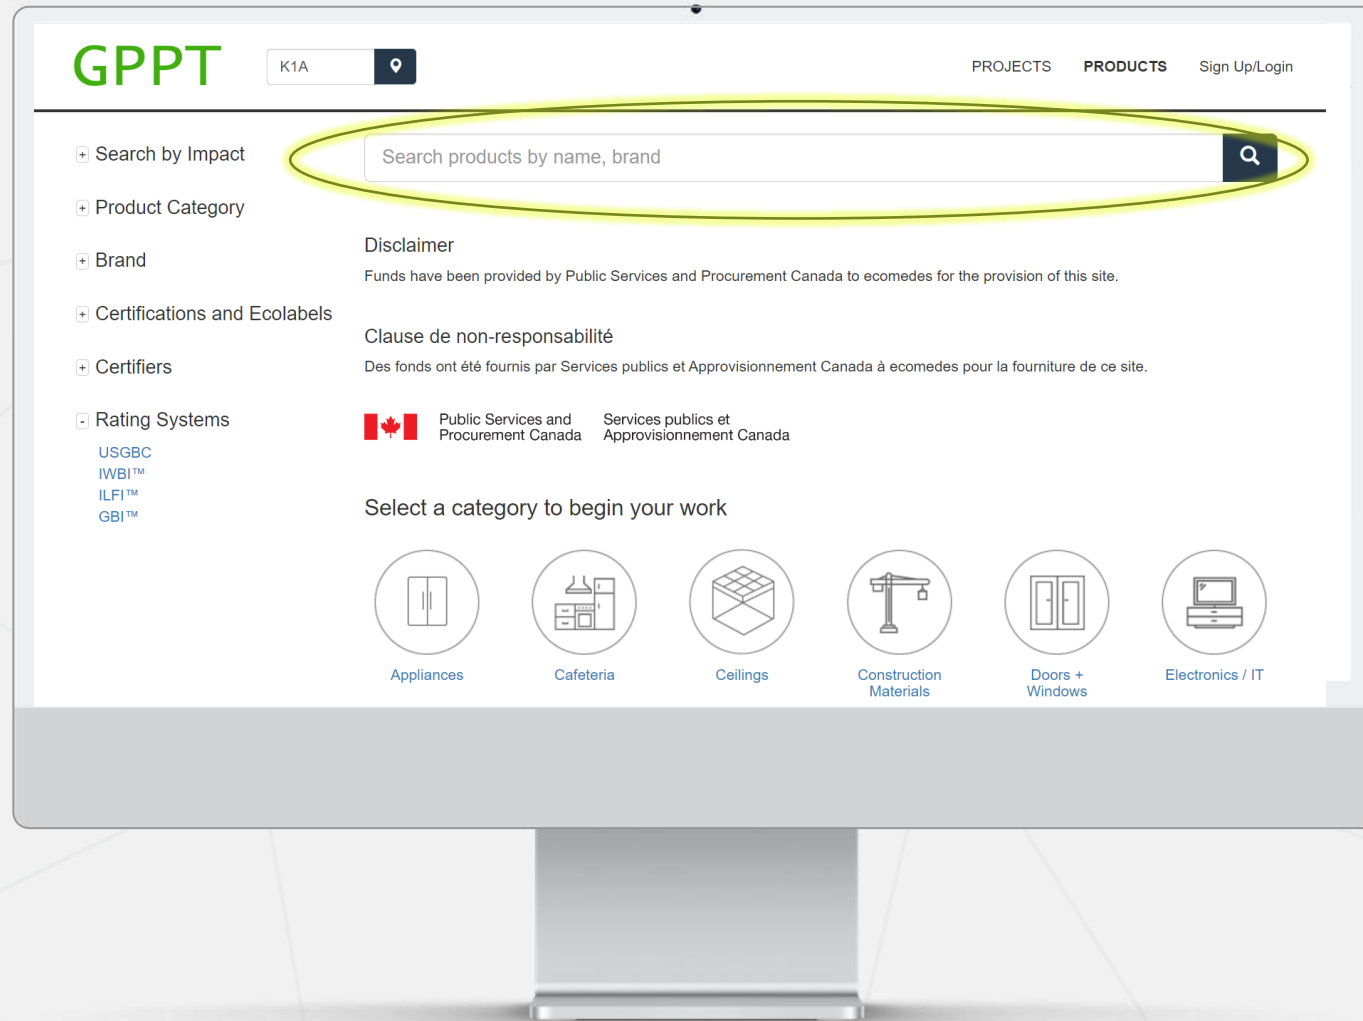

- ❑ Draft filter language along with market data availability shared with procurement teams for review
- ❑ PSPC shares the draft filter pilot requirements and data structure back with stakeholders for feedback prior to Sn. management decision (*if possible)

Stage 3: ecomedes launches pilot product filters into canada.ecomedes.com

- ❑ Onboard the registries of certified products or programs where performance testing can be verified
 - these go into the large ecomedes database used in the U.S. also
- ❑ Manufacturers can enrich their product data with more attributes

Stage 4: Move new filters into ecomedes production Canada.ecomedes.com

Product onboarding frequently asked questions

Question: Are my products on the portal?

- ☐ The GPPT tool is available for use for free. If you want to know if your products are on the portal, try searching for them at Canada.ecomedes.com

Question: If my products are not on the GPPT, how do onboard them?

- ☐ Ensure that your product(s) are certified by widely available and generally accepted sustainability standards for the product categories you participate in.
- ☐ Once above is true ecomedes will automatically pull your products into the GPPT tool through the certifications.
- ☐ Ecomedes is in the process of pulling in Canadian certifications and registries e.g. ENERGY STAR Canada, the Net Zero Challenge, etc.

Question: How do I add additional product level data to products?

- ☐ Brands/Vendors can enrich their product catalog by uploading additional data elements like:
 - ☐ General brand/product data (i.e. images, product descriptions, links back to product pages)
 - ☐ Manufacturer location (e.g. in Canada)
 - ☐ Product performance and additional Canada- specific ecolabels/certifications or clean tech programs not currently found on Canada.ecomedes.com This will be accomplished by utilizing an Excel / Google Sheets data enrichment template.
 - ☐ These templates will be distributed to vendors once the recommended product category filters and clean tech programs are finalized.
