Green Products Database Pilot Virtual Consultation: Finishes

Green Public Procurement Tool for Federal Assets Initiative

Consultation Supported by:

Wednesday October 23, 2024

1 - 2:30 PM EST (Zoom)

Services publics et Approvisionnement Canada

Today's Objectives

 Learning about the Green Public Procurement Tool for Federal Assets Initiative – what it is and what it's trying to do

- Hearing from you
 - Are the environmental certifications we cover today ones you recognize?
 - Do you use these in your organization / industry?
 - What is missing and what do you recommend for the Canadian version?

 Learning about the product search platform itself and what its capabilities are

Getting to know you:

Stakeholder type?

Organization HQ?

Business size?

Today's Agenda

Public Services and Procurement Canada: Overview

PSPC is the central federal purchasing agent and real property manager for the Government of Canada

Vision: to excel in government operations

Mission: to deliver high-quality, central programs and services that ensure sound stewardship on behalf of Canadians and meet the program needs of federal institutions

The GoC owns approx. 32,000 buildings, 20,000 engineering assets and 40,000 fleet and is the largest asset owner in Canada.

Policy on Green Procurement, 2006

◆ PSPC will: "include environmentally preferable options (i.e. that have a lesser or reduced impact on the environment over the life cycle of the good or service, when compared with competing goods or services serving the same purpose) in the procurement services offered to client departments where feasible."

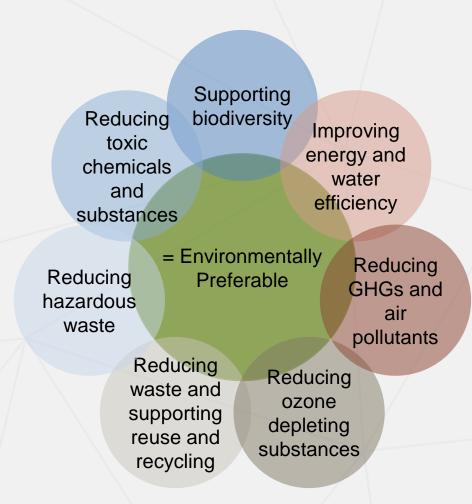

Definition of "Green" or environmentally preferable

"Environmentally preferable goods and services are those that have a lesser or reduced impact on the environment over the life cycle of the good or service, when compared with competing goods or services serving the same purpose. Environmental considerations include, among other things: the reduction of greenhouse gas emissions and air contaminants; improved energy and water efficiency; reduced waste and support reuse and recycling; the use of renewable resources; reduced hazardous waste; reduced toxic and hazardous substances; and biodiversity."

- Policy on Green Procurement

 Canada's Competition Bureau requires that environmental claims must not be false or misleading and must be based on <u>adequate and proper testing</u>

Definition of Clean technology

The Government of Canada defines clean technology as:

- Any good or service designed with the primary purpose of contributing to remediating or preventing any type of environmental damage.
- Any good or service that is less polluting or more resource efficient than equivalent normal products that furnish a similar utility.

Examples include: renewable and non-emitting energy; smart grid and energy storage; advanced and lightweight materials; energy efficiency controls and design; air, water, wastewater and environmental remediation; transportation; waste and recycling; and biofuels and biomaterials.

Objectives of the GPPT

Primary objective:

 To help buyers (contracting authorities) and clients to easily identify green and cleantech products

Secondary objectives:

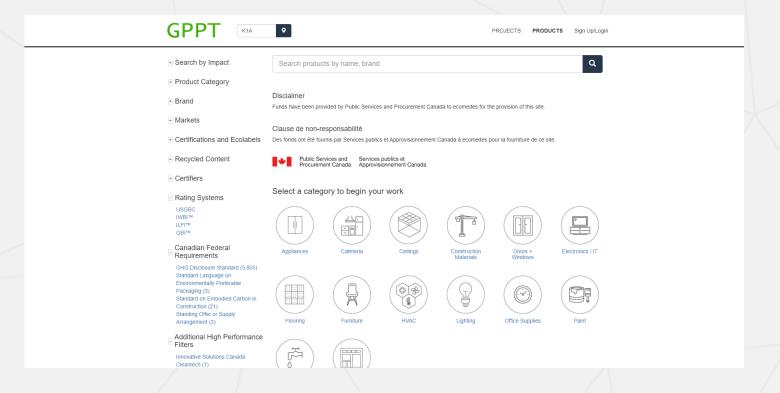

- Enable PSPC to meet its responsibilities under the Policy on Green Procurement to provide verified and up-to-date environmentally preferable options to client departments
- Align green procurement requirements with the U.S. and other public procurers to better signal market demand
- Increase green and clean technology procurement and support Canadian SMEs

Configuring a Canadian Green Product Search Tool

What is it?

Customized and configured
 ("Canadianized") version of a
 certified environmentally preferable
 products database used by the
 United States General Services
 Administration and other large
 institutional buyers in the U.S. (e.g.
 universities, the Sustainable
 Purchasing Leadership Council
 etc.) in procurement and real
 property applications

How we intend to use the GPPT in Canada – pilot phase

- Internally: as a research tool to share information between clients and buyers about available environmentally preferable products including those from Canadian cleantech SMEs
- Externally: available publicly to anyone, the database is a public source of third-party verified environmental information that is up-todate (database updated monthly) and available for use across supply chains and product categories
- As more Canadian products are added and as the certifications are vetted, there is the potential that its use be incented or required in procurement processes and in real property contracting

Introduction to ecomedes

Simplify Product Research and Accelerate Sustainable Procurement by automating the Search for sustainability data, automating compliance Analysis and streamlining Documentation & Reporting

Data Collection & Curation

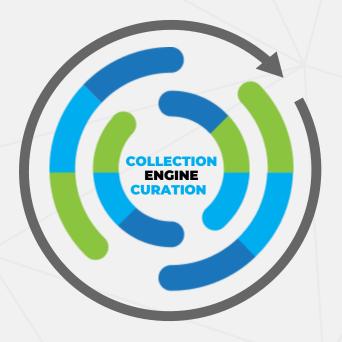

Data Enrichment

Building Product Manufacturer Sourced:

- Company / Organizational Attributes
- Brand / Product Assets
- Product Performance Attributes
- Adjacent Brand Resources

Refreshed Monthly

Largest Curated Product Database in the market

~10,000 Brands

~1,200,000+ Products

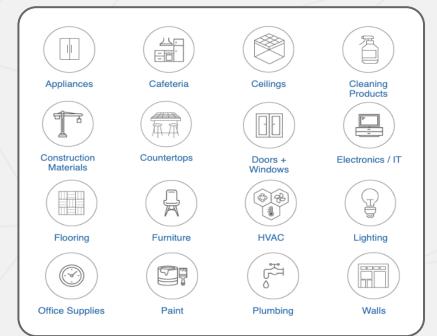

~100+ Ecolabels / Certifications / Standards

~60+ Registry Sources

~3,000 Unique Brand/Factory/Product Attributes

Automated Alignment & Analysis drives marketplace empowerment

Sustainability Impact Frameworks

Green Project & Procurement Frameworks

Platforms configured for Institutional Buyers

Canada.ecomedes.com

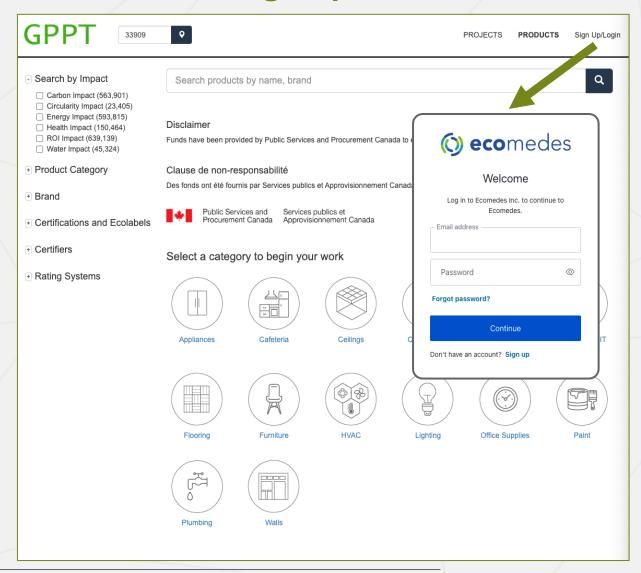

How Does this Help You?

- The platform was designed to save you time
- Increase Green Procurement within Government
- Streamline Green procurement reporting for Agencies and Departments

Some of the most common activities that the platform streamlines:

- Searching for products that meet the certifications, ecolabels, specifications, etc
- Analyzing product performance attributes
- Documenting procurement and project decisions
- Sharing Impact Reports with project team members

Pilot Account Sign-up

Simple Signup takes 1 minute & saves 100s of hours per year

- The Platforms are typically open to anyone that wants to simplify sustainable product search, analysis and documentation.
 - Procurement Teams
 - Vendor Teams
 - Project Teams
 - Manufacturer Teams
- Creating an account lets you:
 - Analyze Products and projects
 - Download product documentation
 - Save your work on projects

Search & Discovery: Driven by Data

- Search by Impact
- Product Category
- Brand
- Certifications and Ecolabels
 - Over 50 to choose from
 - This can be configured to your needs
 - Additional Resources can be added

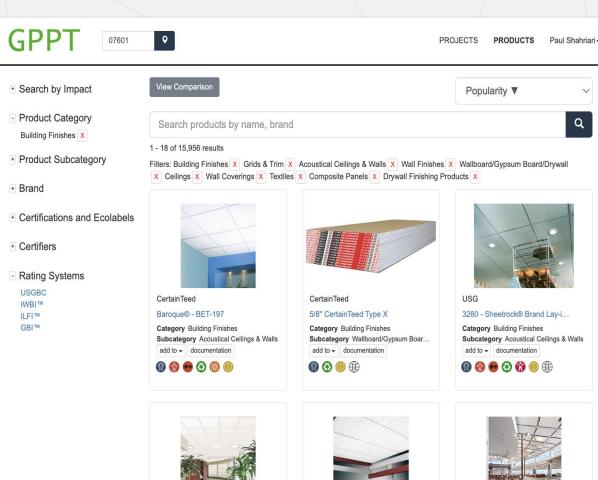

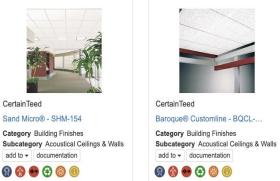

Platform Tour - Search & Discovery: Driven by Data

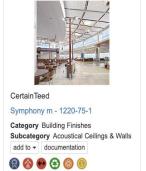

As you refine your search with left hand navigation, your can discover products through a variety of paths

- **Product Category**
 - Building Finishes (52,150)
- **Certifications and Ecolabels**
 - +Vantage Vinyl® Verified (739)
 - ANSI/NSI 373 Sustainable Stone (38)
 - BioPreferred® (9,926)
 - C2C Certified (6,100)
 - Declare (4,668)
 - EC3 Embodied Carbon (4,234)
 - **Environmental Product** Declaration (EPD) (26,315)
 - FloorScore (6,326)
 - Green Label Plus (20,167)
 - **Green Squared Certificate** (581)
 - GreenCircle (13,100)
 - Greenhealth Approved (3)
 - Health Product Declaration (HPD) (32,043)
 - Intertek Clean Air Gold (491)

- Intertek Clean Air Silver (8)
- Life Cycle Assessment (LCA) (254)
- Living Product Challenge (171)
- NSF/ANSI 140 Carpet (19,437)
- NSF/ANSI 332 Resilient Floor Coverings (308)
- PFAS Addressed (10,522)
- SCS Indoor Advantage Gold (113)
- SCS Recycled Content Certified (162)
- **UL GREENGUARD** (358)
- **UL GREENGUARD** Gold (1,244)

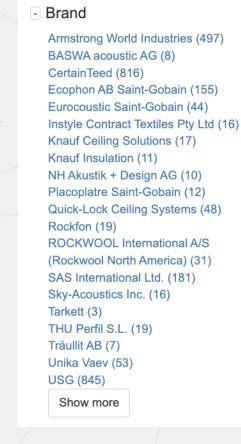

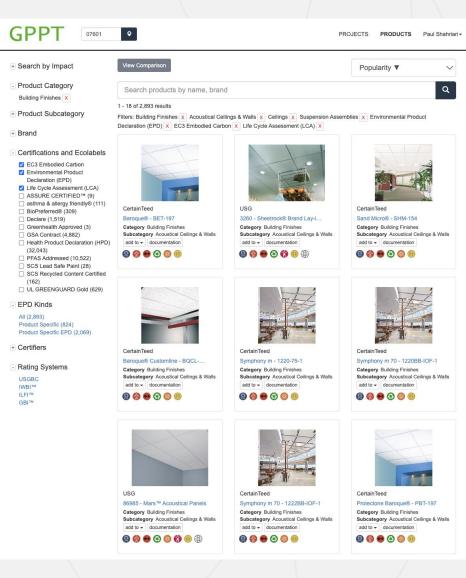

CertainTeed

Search & Discovery: Driven by Data

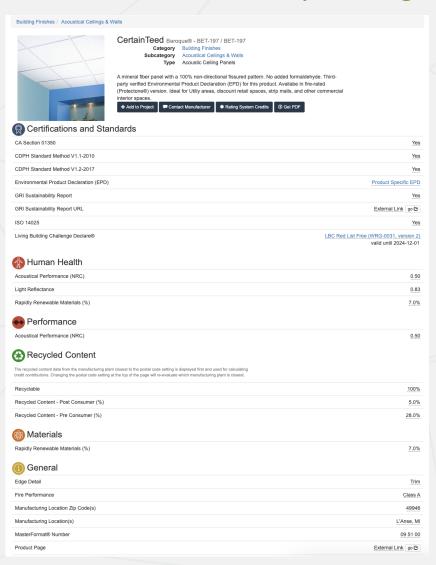

As you refine your search with left hand navigation, your can discover products through a variety of paths

- Product Category / Subcategory / Type
 Refinement
 - Building Finishes
 - Ceilings
- Certifications and Ecolabels Refinement
 - EC3
 - EPD
 - LCA
- EPD Kinds

Rich Product Data at your fingertips

The System organizes all the data.

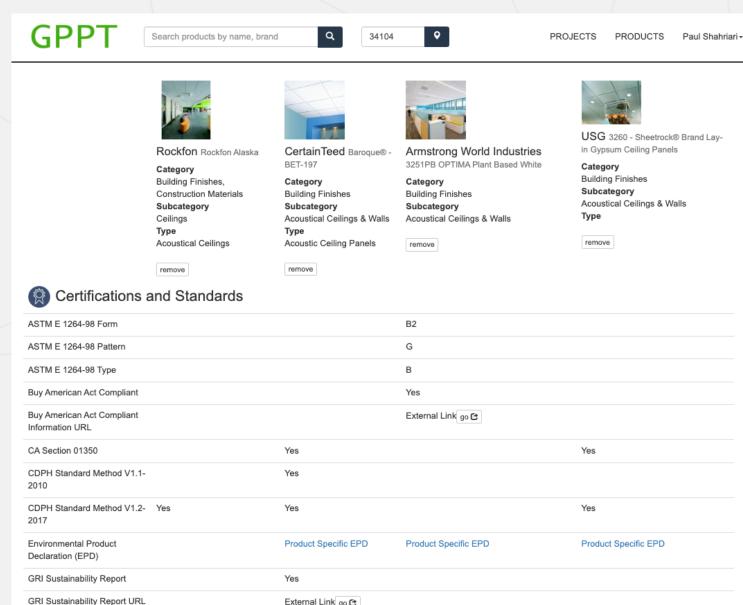

- Certification and Standards
 - CA Section 01350
 - CDPH Standard Method v1.2-2017
 - EPD
 - GRI
 - ISO
 - Living Building Challenge Declare
- Human Health
 - Acoustical Performance
- Performance
- Recycled Content
- Materials
 - Rapidly Renewable

25+

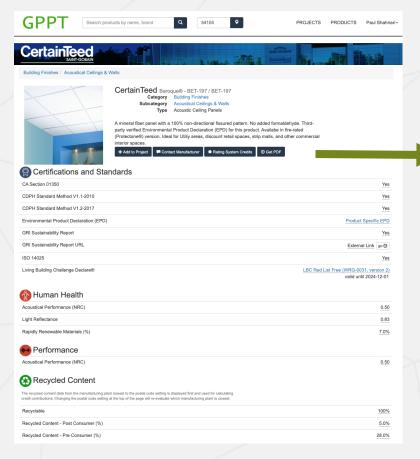

Product Comparisons available in seconds

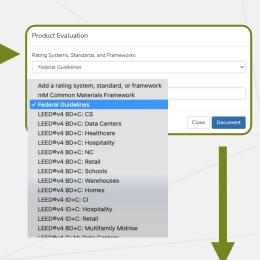

Data Driven Analysis

- 4 Products Side by Side
- Apples to Apples
- 60+ Unique Product Attributes
 - Certifications and Standards
 - Human Health
 - Planet Health
 - Performance
 - Recycled Content
 - Materials
 - Chemical Avoidance
 - General

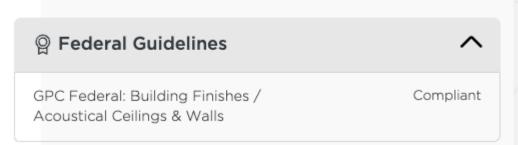

Product Analysis & Documentation

- Products and Projects can be analyzed and documented through a wide variety of compliance and contribution methodologies:
 - Canadian Green Procurement Rules
 - US Federal Guidelines GPC
 - LEED
 - o WELL
 - Living Building Challenge
 - GreenGlobes
 - mindfulMATERIALS

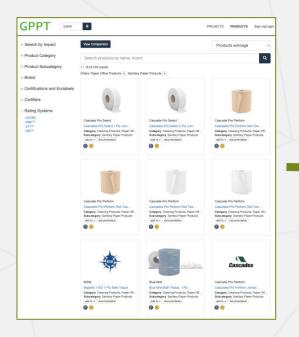

Rating System Contributions

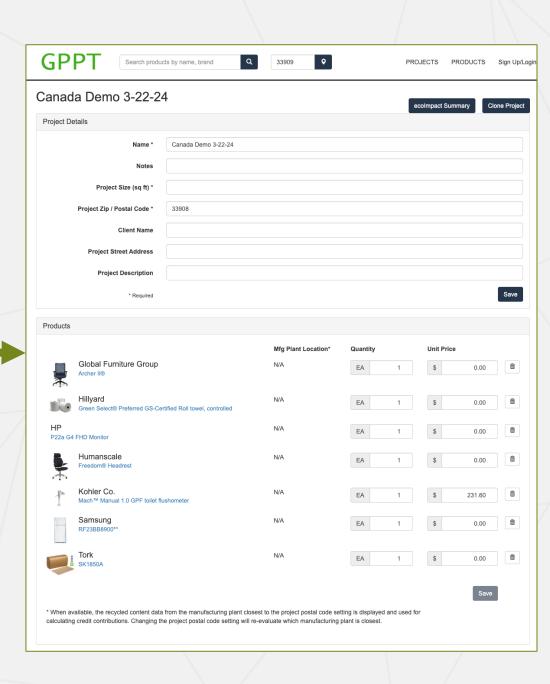

Platform Tour Creating a Project

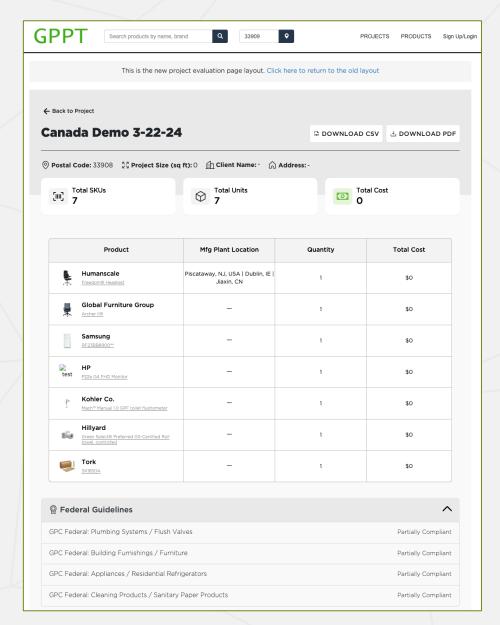

Analyzing Compliance across multiple product categories, brands and a wide array of products

- Select Products from Search Results or on Product Page
- 2. Utilize Add To: Project Button
- 3. Create New Project or add to Existing Project you have
- 4. Add all products you would like to analyze and document impact into your project
- 5. Edit Project Details
- 6. Edit Qty & Price
- 7. Select Rating System(s)
- 8. Click Evaluate
- Your Full Report will be ready in a couple of seconds

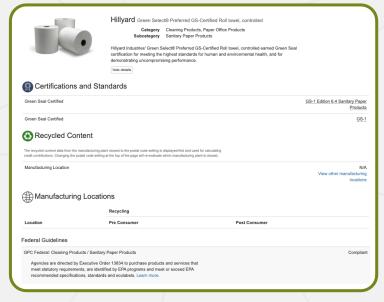

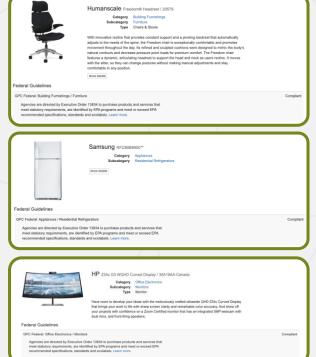

Platform Tour Project / Procurement Documentation in a single click

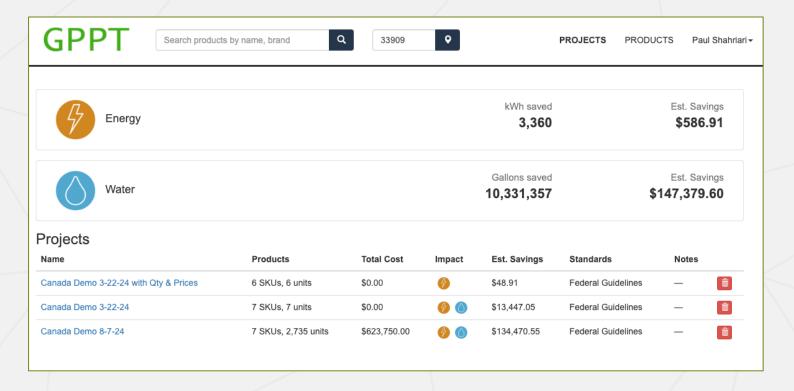

All Products included in the project/procurement have their individual product pages included in the documentation with their individual compliance and contribution to Federal Guidelines + LEED, WELL, etc.

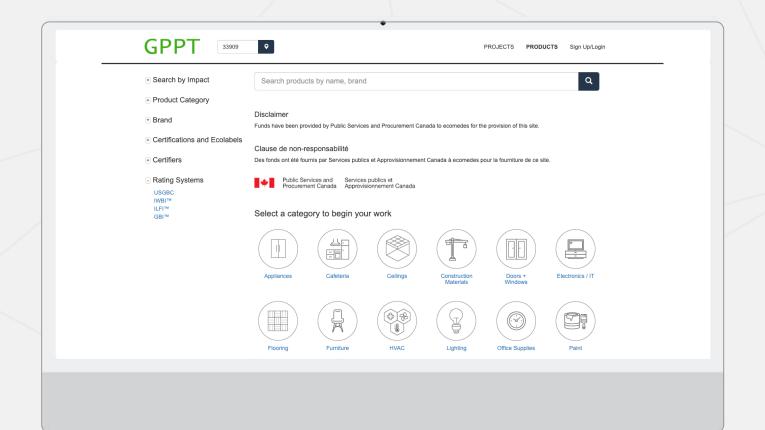

Platform Tour User Impact Dashboard

- Each registered User has the ability to manage their saved projects.
- Each project holds:
 - Products and the associated data
 + Qty & Unit Price with Total Cost.
 - Green Evaluation Programs
 Selected for evaluation
 - Estimated Savings associated with Energy and Water Savings over the analysis period for each project
- Overall Energy and Water Savings are rolled up for the user.

- Formerly Recycling Council of Ontario, with 40 years of expertise in circular policies, programs, standards and research
- Research and promote best practices
- Act as a collaborator, convening public and private sector interests
- Unique membership: spans entire value and supply chains
 - Governments at all levels; industry producers, corporations, SMEs, collectors, processors; academia, researchers; start-ups; community

THE PUBLIC PROCUREMENT OPPORTUNITY

- Annual Public Sector Procurement Spend represents 13% of Canada's GDP
- Direct and Indirect Influences:
 - Direct spending on goods and services.
 - Stimulus to the economy.
 - Funding to other organizations.
 - Training and employment.
- Most immediate and direct mechanism to drive broader public policy objectives: economic, environmental, and social.
- Pace setter and market shaper.
- **Scalable** no matter size nor location.

\$400 BILLION

Amount spent on public sector procurement in Canada annually.

GPPT Customization Methodology

- Review and summarize existing U.S. GSA and other environmental labels and product certifications available within ecomedes platform
- Research additional relevant Canadian product-focused environmental labels and certifications
- Stakeholder engagement including
 - Virtual consultations, based on product categories
 - Stakeholder feedback survey (online)
 - Targeted engagements: industry associations, domestic manufacturers, etc.
- Based on stakeholder feedback, propose environmental labels and other data sources (third party verified) that reflect environmental preferability relevant to domestic Canadian perspective
- PSPC finalizes product category filters selection
- Import into GPPT

Scope of Product Category Consultation

Lighting

Office Furniture

Office Supplies and Packaging

Plumbing

Customization of ecomedes **Product Search Tool** developed for U.S. **General Services Administration**

Basis for U.S. GSA tool:

- Third-party verified data
 - Simplify informed decision making
- Ecolabelling programs
 - Voluntary, consensus-based
 - Multiple 'attributes' preferred (i.e. more than one environmental impact)
- U.S. EPA 'required purchasing programs' basis
 - EPA Framework for the Assessment of **Environmental Performance Standards** and Ecolabels for Federal Purchasing

Paint

Last Updated: 10/16/24

Click to see brand name products that meet these requirements .

PRODUCT DETAILS

To the maximum extent practicable, federal agencies are required to buy sustainable products, which are products that meet the purchasing program(s) listed below.

If there is more than one program listed below, agencies are directed to prioritize multi-attribute products, which meet statutory purchasing program requirements (*) and one or more required Environmental Protection Agency purchasing programs

Review our frequently asked questions for more information.

Reprocessed Latex Paint --Dark Colors

Statutory Purchasing Program Requirements:

Buy on GSA Advantage!

(20% minimum biobased content)

(50 - 99% recovered material, including 50 - 99% postconsumer material)

Required EPA Purchasing Programs:

Stakeholder Consultation

Key Objectives Today

- Gather your insights on ecolabels and certifications stakeholders are using for each product category
- Identify additional certifications, standards and ecolabels that should be considered
- Solicit feedback on the benefits and obstacles of such ecolabels/ and certifications
- Solicit other considerations for the GPPT tool
- Identify whether your products may already be represented in the searchable database

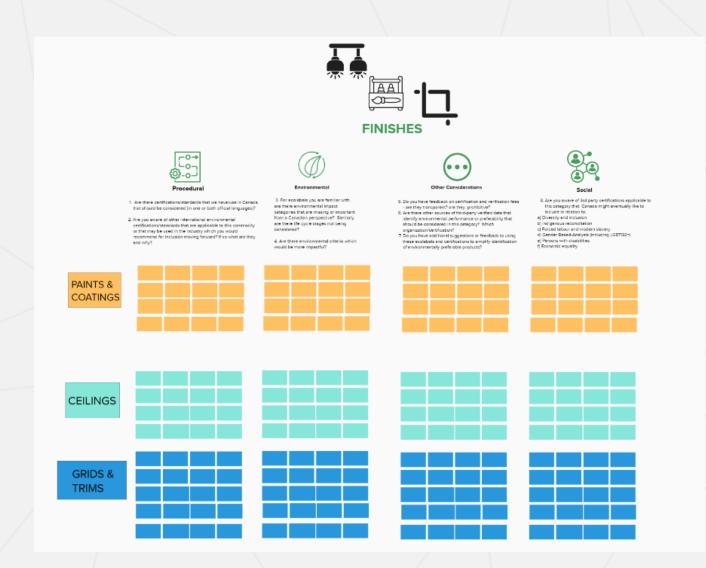

Qualitative/Open Feedback

Chatham House Rule

- When a meeting, or part thereof, is held under the Chatham House Rule, participants are free to use the information received, but neither the identity nor the affiliation of the speaker(s), nor that of any other participant, may be revealed. The purpose of the rule is to encourage open discussion since anything said is "off the record".
- Facilitators are neutral parties who will filter the input and feedback gathered into a summary document. No contracting authorities are here today.

Product Sub-category Feedback

- Mural Board post-it notes
 - 1. Finishes
 - 1. Paints & Coatings = Orange
 - 2. Ceilings = Turquoise
 - 3. Grids & Trims = Blue

Consultation & onboarding process per category

Stage 1: Collect multiple streams of input and review research findings:

- What certifications and programs are currently used by Canadian manufacturers?
- What do other levels of government, other stakeholders specify?
- □ Once we know the relevant certifications and programs, are there product registries?

Stage 2: Draft Product Filter Recommendations and ecodata requirements

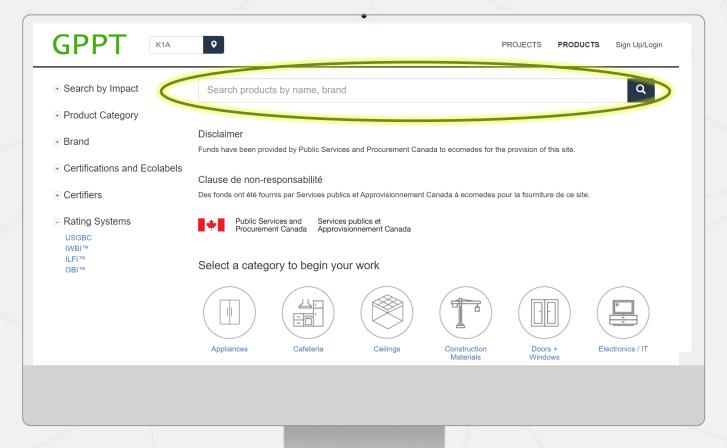

- □ Draft filter language along with market data availability shared with procurement teams for review
- PSPC shares the draft filter pilot requirements and data structure back with stakeholders for feedback prior to Sn. management decision (*if possible)

Stage 3: Ecomedes launches pilot product filters into canada.ecomedes.com

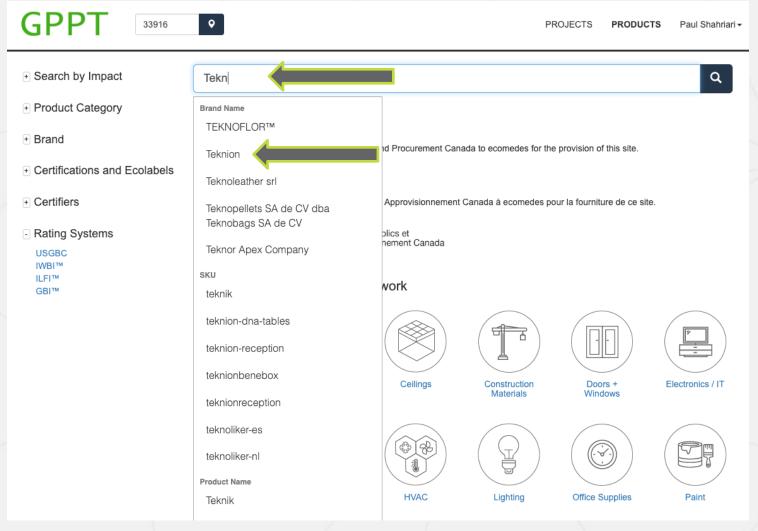

- Onboard the registries of certified products or programs where performance testing can be verified
 - these go into the large ecomedes database used in the U.S. also
- Manufacturers can enrich their product data with more attributes

Stage 4: Move new filters into ecomedes production Canada.ecomedes.com
